

RESOLUTION NO. 2007-06

**A RESOLUTION OF THE BOARD OF TRUSTEES OF THE TOWN
OF NEDERLAND ENDORSING THE U.S. MAYOR'S CLIMATE
PROTECTION AGREEMENT**

WHEREAS, the U.S. Conference of Mayors has previously adopted strong policy resolutions calling for cities, communities and the federal government to take actions to reduce global warming pollution; and

WHEREAS, the Inter-Governmental Panel on Climate Change (IPCC), the international community's most respected assemblage of scientists, has found that climate disruption is a reality and that human activities are largely responsible for increasing concentrations of global warming pollution; and

WHEREAS, recent, well-documented impacts of climate disruption include average global sea level increases of four to eight inches during the 20th century, a 40 percent decline in Arctic sea-ice thickness, and nine of the ten hottest years on record occurring in the past decade; and

WHEREAS, climate disruption of the magnitude now predicted by the scientific community will cause extremely costly disruption of human and natural systems throughout the world including increased risk of floods or droughts, sea level rises, more frequent and extreme heat waves, and more frequent and greater concentrations of smog; and

WHEREAS, on February 16, 2005, the Kyoto Protocol, an international agreement to address climate disruption, went into effect in the 141 countries that have ratified it to date; 38 of those countries are now legally required to reduce greenhouse gas emissions on average 5.2 percent below 1990 levels by 2012; and

WHEREAS, the United States of America, with less than five percent of the world's population, is responsible for producing approximately 25 percent of the world's global warming pollutants; and

WHEREAS, the Kyoto Protocol emissions reduction target for the U.S. would have been 7 percent below 1990 levels by 2012; and

WHEREAS, many leading U.S. companies that have adopted greenhouse gas reduction programs to demonstrate corporate social responsibility have also publicly expressed preference for the U.S. to adopt precise and mandatory emissions targets and timetables as a means by which to remain competitive in the international marketplace, to mitigate financial risk and to promote sound investment decisions; and

WHEREAS, state and local governments throughout the U.S. are adopting emission reduction targets and programs and that this leadership is bipartisan, coming from Republican and Democratic Governors and Mayors alike; and

WHEREAS, many cities throughout the nation, both large and small, are reducing global warming pollutants through programs that provide economic and quality of life benefits such as reduced energy bills, green space preservation, air quality improvements, reduced traffic congestion, improved transportation choices, and economic development and job creation through energy conservation and new energy technologies; and

WHEREAS, approximately 500 Mayors from around the nation have signed the U.S. Mayor's Climate Protection Agreement which, as amended at the 73rd Annual U.S. Conference of Mayor's meeting, reads:

The U.S. Mayors Climate Protection Agreement

We urge the federal government and state governments to enact policies and programs to meet or beat the target of reducing global warming pollution levels to 7 percent below 1990 levels by 2012, including efforts to reduce the U.S. dependence on fossil fuels and accelerate the development of clean, economical energy resources and fuel-efficient technologies such as conservation, methane recovery for energy generation, waste to energy, wind and solar energy, fuel cells, efficient motor vehicles, and biofuels;

We urge the U.S. Congress to pass bipartisan greenhouse gas reduction legislation that includes: 1) clear timetables and emissions limits, and 2) a flexible, market-based system of tradable allowances among emitting industries; and

We will strive to meet or exceed Kyoto Protocol targets for reducing global warming pollution by taking actions in our own operations and community such as:

1. Inventory global warming emissions in Town operations and in the community, set reduction targets and create an action plan;
2. Adopt and enforce land-use policies that reduce sprawl, preserve open space, and create compact, walkable urban communities;
3. Promote transportation options such as bicycle trails, commuter trip reduction programs, incentives for car pooling and public transit;
4. Increase the use of clean, alternative energy by, for example, investing in "green tags," advocating for the development of renewable energy resources, recovering landfill methane for energy production, and supporting the use of waste to energy technology;
5. Make energy efficiency a priority through building code improvements, retrofitting Town facilities with energy efficient lighting and urging employees to conserve energy and save money;

6. Purchase only Energy Star equipment and appliances for Town use;
7. Practice and promote sustainable building practices using the U.S. Green Building Council's LEED program or a similar system;
8. Increase the average fuel efficiency of municipal fleet vehicles, reduce the number of vehicles, launch an employee education program including anti-idling messages, and convert diesel vehicles to bio-diesel;
9. Evaluate opportunities to increase pump efficiency in water and wastewater systems and recover wastewater treatment methane for energy production;
10. Increase recycling rates in Town operations and in the community;
11. Maintain healthy urban forests and promote tree planting to increase shading and to absorb CO2; and
12. Help educate the public schools, other jurisdictions, professional associations, business and industry about reducing global warming pollution.

NOW, THEREFORE, BE IT RESOLVED that the Nederland Board of Trustees endorses the U.S. Mayor's Climate Protection Agreement as amended by the 73rd annual U.S. Conference of Mayor's meeting and authorizes the Mayor of the Town of Nederland to officially sign a letter of support to the U.S. Conference of Mayor's Climate Protection Center.

BE IT FURTHER RESOLVED that the Town of Nederland will work in conjunction with the U.S. Conference of Mayors and ICLEI Local Governments for Sustainability and other appropriate organizations to track progress and implementation of the U.S. Mayor's Climate Protection Agreement as amended by the 73rd annual U.S. Conference of Mayor's meeting.

INTRODUCED, READ, PASSED AND ADOPTED at the regular meeting of the Trustees of the Town of Nederland, Colorado on the 21st of August, 2007.

TOWN OF NEDERLAND

ATTEST:

Christi Icenogle, Town Clerk

Laura Farris, Mayor
