

MEMORANDUM

To: Board of Trustees

From: Dawn Baumhover
Community Center Coordinator

Date: 4/8/14

Re: Staff report

Ready or not here we come! That is this week's motto at the Community Center. The renovation project downstairs is nearing completion as the final items on the punch list are resolved. *We will formally welcome the community to the new space with a grand opening celebration on May 17. We hope you will stop by and visit.*

(Left) Community Center Coordinator Dawn Baumhover walks through the project to determine any last repairs before completion.

9Health Fair will be held at the Community Center on Saturday May 3 from 7 a.m. to noon. As always, free and low cost screenings will be available, as will a wealth of health-related resources from a variety of

organizations. Visit the website at 9healthfair.org for a list of screenings available in Nederland. A limited number of vouchers are available for basic blood panel.

Evelyn Blodgett of Altitude Catering is the newest kitchen tenant at the Community Center. She will be baking for the Train Cars café. We welcome her and wish her luck in this new endeavor.

The Red Cross will hold Shelter Training for staff and any other interested parties on Tuesday, April 29 from 9 a.m. to 1 p.m. at the Community Center. This training is part of an ongoing effort with the Red Cross since the September floods to equip our mountain communities for activation if the Red Cross is unable to access our facility due to the conditions of the emergency. There is also an effort among the mountain mental health professionals to organize themselves and prepare a response team for such an eventuality.

The addition of an Administrative Assistant at the Community Center has been incredibly helpful over the past couple of months and we are looking forward to what we can accomplish once we are in our permanent office on the lower level. We have also enjoyed the support of our energetic and competent Town intern as he is able to assist. These positions have definitely contributed to more productive facility operations over the past months.
